Introducing Stem Zero made with our 'Ion Shielding Technology'. Making it the world's toughest, yet finest lead free crystal glass.

Handmade STEM ZERO collection is strengthened by employing a special 'surface modification technology', based on an ion-exchange process.

Larger ions are incorporated into the glass' surface structure, replacing the smaller ions which cause strains, thus increasing the strength of the glass by forming 'a compressive stress'. You could say it is beautifully strong.

## Proven by strength tests

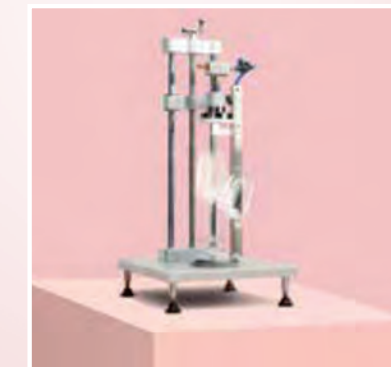

### Bowl Impact Test

35% stronger  
Test is performed according to the standards below: DIN 52295 / Testing of glass - Pendulum impact test EN 12980:2000 / Materials and articles in contact with foodstuffs. Non-metallic articles for catering and industrial use. Method of test for the determination of impact resistance.

### Stem Impact Test

2x stronger  
Test is performed according to the standards below: DIN 52295 / Testing of glass - Pendulum impact test EN 12980:2000 / Materials and articles in contact with foodstuffs. Non-metallic articles for catering and industrial use. Method of test for the determination of impact resistance.

### Free Fall Test

(In-house method):  
Glass is released for a free fall from the height of 28 cm.

### Bending Test

(In house method): Up to 13°  
Glass is bent at a certain angle from the top of the bowl keeping the stem fixed.

**Dishwasher Safety Test** Up to 2.000 cycles  
DIN 10511 "commercial dishwashing with glass washing machines - hygiene requirements, type testing"  
Water hardness: 0-1 dH - Temperature of detergent tank: 55 °C - Temperature of rinse agent: 65 °C - Contact time per cycle: 120s - Detergent: Industrial type, pH

Renaissance  
H: 5" T: 3 1/4" B: 2 2/8"  
13 1/2oz/400 ml.  
2 doz./14 3/4lbs./ .96 cu.ft.

- Flared rim directs the beer in a way to better accentuate the attributes of your beverage.

(Reviva)

- The bowl is designed to assist in the accumulation and the release of the attributes of the hops.

- The "hips" are for easy holding, and help avoid warming beer with palm.

- Nucleation for highly enhanced carbonation release. (Revival 16oz and Renaissance standard only)

- The vessel is designed to stack without pressure on the rim.

# custom design & decoration

We offer a wide range of custom decorating, etching, nucleation, laser, and mold options. Whether you are a local pub, a large chain of restaurants, or in search of a promotional vehicle for your brand. Depending on the material of the item (glass, plastic, steel, wood), Hospitality Brands can determine best branding method.

From having your wine glasses printed with a pour line for portion control, to helping you create signature glassware for presentation and profits, we have you covered.

We also offer complete glassware and plastic mold design for clients who choose to design and manufacture their own signature mold.

For more information on our custom capabilities and decoration programs, please contact your Hospitality Brands representative:

# Polycarbonate

**STRAHL**  
INCREDIBLE STRENGTH

SUPERGLAS

HOSPITALITY  
BRANDS

Polycarbonate offers an amazing alternative to glass for those that need the extra protection and safety of a shatterproof product while retaining the high quality feel and clarity that they want. Polycarbonate is virtually unbreakable and is ideal for pools, outdoor venues, sporting events, rooftops, and children's events.

Every polycarbonate item we offer is FDA approved and its superior insulation keeps cold drinks cool for longer. Our products are dishwasher safe and easy to clean.

# STRAHL

INCREDIBLE STRENGTH

STRAHL GIVES YOU THE ELEGANCE AND HAND-FEEL OF GLASS, BUT IS VIRTUALLY UNBREAKABLE, MAKING IT THE BEVERAGWARE CHOICE OF THE WORLD'S MOST PRESTIGIOUS HOTELS AND RESORTS.

HAND FINISHED

CRYSTAL CLEAR

FRIDGE/FREEZER SAFE

DISHWASHER SAFE

VIRTUALLY UNBREAKABLE

REDUCE RE-ORDER FREQUENCY

## Beautifully elegant.

All Strahl® products are made of a high quality polycarbonate, a remarkable material that creates the clarity and elegance of glass. What's more, every product is hand finished to remove manufacturing join lines. The result? Beverageware that's beautiful to look at, and equally beautiful to drink from.

## Exquisitely versatile.

With Strahl®, it's possible to entertain in style, anywhere. Our exquisite products are designed to be chilled in either the refrigerator or freezer, while superior insulation properties keep beverages at optimal drinking temperature for longer.

## Incredibly strong.

Unlike glass, Strahl® beverageware doesn't shatter so it's an extremely safe and long-lasting alternative. Not only is it stronger, no Strahl® product is complete until it has undergone a unique finishing process to extend its lifespan and durability.

## Remarkably easy to clean.

Strahl® products can be cleaned in commercial dishwasher systems with ease, at either high or low temperatures. So they're ideal for high-use situations such as restaurants, bars or catering companies.

## Clearly cost-effective.

Strahl® beverageware's tough and durable polycarbonate material reduces the frequency of re-ordering, so it's a cost saving alternative to glass.

## Passes the test.

Strahl® products have been tested in a STARLINE GM High performance glass washer for 2000 wash cycles.

### Test details:

- Klenzmatic KM1 Glasswasher detergent
- Wash temperature 65 °Celsius (149 °Fahrenheit)
- Rinse temperature 80 °Celsius (176 °Fahrenheit)
- Wash cycle time 45 seconds
- Rinse cycle time 15 seconds

### Results:

After 2000 wash cycles, Strahl® beverageware products showed minimal micro scratches, not visible under normal usage conditions.

## Your Strahl® 'incredible strength' guarantee.

Your Strahl® beverageware is made of the highest quality polycarbonate, a material chosen for its incredible strength, clarity and durability.

However, if you're not satisfied with your purchase due to faulty or defective materials, workmanship or manufacturing, please return the product with proof of purchase to the original supplier - and it will be replaced free of charge. Naturally, this guarantee does not extend to fair wear and tear or damage caused by misuse or mishandling.

## What can you serve in your Strahl® beverageware?

The unique properties of Strahl® means cold drinks can remain cold for much longer than drinks served in glass or ceramic. You can serve almost any cold beverages or food in Strahl, except for aniseed-based drinks such as Pernod, Anis, Ricard, Raki and Ouzo as they can cause permanent damage.

Strahl® is recommended for use with cold or room temperature drinks and food. If you plan to use it for hot drinks or in the microwave, please refer to our FAQ page at [strahlbeverageware.com](http://strahlbeverageware.com).

## How to care for your Strahl® beverageware.

Strahl® is made from incredibly strong polycarbonate, which requires slightly different handling to standard glassware:

1. Avoid stacking Strahl® products while carrying or storing (except the CapellaStack range, which is designed for stacking,) as they may scratch if they rub together.
2. Wash your Strahl® beverageware in the dishwasher or by hand with warm soapy water to remove residues from juice, milk, stout etc. Washing in a sterilizer can result in a build-up of residue.
3. Avoid cleaning with abrasive brushes, which may scratch. Buffing with a microfiber glass polishing cloth will remove light scratches and abrasions and help keep Strahl® strong and crystal clear.

## FDA approved.

All Strahl® products are FDA approved for all food contact surfaces, materials comply with FDA 21 CFE 177.1520 (olefin polymers) including cc 3.1 for food contact application (polyethylene,) 21 CFR 178.1580 (polycarbonate polymers) for food contact applications at up to 212°F.

**Superglas is made of an exceptional unbreakable high-tech plastic. The Club series is a true design statement for hospitality, offering the highest quality and ecological solution for professional use. Superglas by Koziol is produced in Germany and compliant with the global regulations for outdoor pools, restaurants and roof top bars.**

- Care instructions to enjoy Superglas for years to come:
- Improved care practices for the use of Polycarbonates will extend the life of the product:
  - Polycarbonate Barware is dishwasher safe to a temperature of 158-160 degrees F.
  - New glasses should be rinsed at temperatures above 176 degrees F either in the dishwasher or by hand to reduce tension in the glass.
  - After rinsing use a detergent with a pH between 5-7 and rinse aids made especially for plastic. Best results are achieved with cleaning agent Renovate from Proton.
  - To maintain the product in its best condition, it is recommended that a low temperature wash cycle below 140F for both wash and rinse temperature is used. The combination of detergents and raised temperatures can lead to environmental stress cracking in the plastic surface. If washer temperatures are above this then it is recommended to hand wash the plastic barware.
  - It is important to make sure that the Polycarbonates are not rubbing together during the rinse cycle in a glass washer.
  - Polycarbonate SUPERGLAS drink ware is almost indestructible, hard and rigid and in many cases virtually identical to glass.
  - Polycarbonate – is a very strong and virtually unbreakable plastic, the strongest plastic of all. Our polycarbonate glassware is glass washer safe up to at least 2,000 cycles.
  - Insulates 4x better than glass.
  - Always set glasses loosely into the dishwasher and wash at a maximum of 160 degrees Fahrenheit. Printed glasses up to 140 degrees Fahrenheit and avoid drying with hot air fans.
  - Avoid using scouring pads or abrasive cleaners for the removal of residue. When hand washing always use a soft sponge or dish brush.
  - Soft microfiber cloths are preferred for polishing.

## Pourers & Spouts

Uberbartools pourers have a unique design which prevents them from having an inconsistent pour speed and from clogging. Moreover, the design is more durable - with replaceable corks, no rusting, and easy disassemble for cleaning. This Means the pourer has a longer life and is more efficient as a tool; as well as less wastage of spirits.

# Espresso

## Dual

A beautifully minimal and witty clear glass. The dual is a one-piece item; two glasses inverted, enabling the user to decide which type of coffee they want to drink. The shorter of the two glasses is perfect for a single espresso, while the longer glass can be used for a double. Whether for a quick pick me-up during the day, or a more leisurely after-dinner experience, the Dual covers all the bases.

**C Espresso Glass**

No. 22298-024

H: 4 3/4" T: 2 1/4"  
24 pcs

## Addict

A simple yet stylish coffee glass, the Addict is perfectly balanced with a smooth rim and a strong yet easy-to-grip glass-blown handle. The glass is at once refined yet robust, much like the flavour of the coffee it helps to enhance. Its simple lines, delicately tapering form, widening to rest on a solid base, offers both sophistication and style. It is a discerning glass for similarly discerning coffee-drinkers.

**C Espresso Glass**

No. 22289-024

H: 3 1/2" T: 3"  
4 1/2 oz./133 ml.  
24 pcs

## Delizia

The Delizia is an elegant tasting glass that works particularly well with coffee. Its smooth yet solid base enables you to hold the glass without fear of scalding. The glass itself is crystal clear, allowing you to appreciate the rich color of the coffee. The rim of the glass is delicate and fine, the bowl wide enough to permit the aromas to circulate, gently sloping towards the rim, capturing the flavours. For coffee connoisseurs, the Delizia is a welcome item, both enhancing the drinking experience, while providing a perfect ending to any meal.

## Ceramics Care Advice

### Storing:

Placing rubber or plastic mats on large stainless steel surfaces usually found in industrial kitchens can help reduce metal marking to ceramics.

Rubber or plastic mats can also be placed in stacking areas, trolleys or sinks to further reduce the chance of metal marking.

Replace or repair any plastic coated racks that may have become worn and the metal underneath exposed, as this again could cause damage to your ceramics.

### Using:

Don't scrape off leftovers – wipe off with a paper towel or a plastic/rubber scraper.

These ceramics are suitable for microwave use, however be advised that any decorated item that includes metal will not be microwave safe.

Use cutlery that is of a high grade steel as a minimum requirement, as some cutlery in use today is made from low-grade steel, which being soft in nature increases the chance of metal marking.

Using metal utensils against ceramics can also cause metal marking, try to keep this to a minimum or use plastic utensils.

### Washing:

These products are specially designed to withstand the rigours of the Foodservice and Hospitality trade, including automatic dishwashing found widely in most businesses. To ensure the quality level of the product it is important to take note of the following:

Strictly follow recommended dishwashing procedures set out by the manufacturer and use the correct dose application of the detergent.

The use of an approved detergent is recommended.

For effective cleaning, we recommend that the dishwashing temperature and the final rinse be set between 55 to 60°C. Operating at higher temperature levels in order to wash crockery 'properly' is a definite case of overkill and detrimental to all tableware.

Repair or replace any plastic coated metal in the dishwasher that may have worn away as this may result in metal marking.

Stack ceramics separately to other crockery in the dishwasher such as cutlery or pans and ensure items do not vibrate against each other during the cycle.

Overdosing on detergent or using excessively high temperatures will cause deterioration to the glazed finish or damage any decoration on the product.

### Metal Marking

Metal marking occurs when a ceramic item comes into contact with metal surfaces or utensils, which can cause metal tracing to be left on the ceramic item due to certain types of steel being softer than the glaze of the ceramic.

Despite the unsightly appearance of metal marking, it is not a cause for concern as it can be easily removed by the application of a gentle household non-abrasive cleaner.

### Wire Baskets & Presentation Papers:

- Not suitable for cooking and should be used as presentation only.
- Suitable for dishwashers
- Not suitable for ovens or microwaves
- Presentation papers are 100% biodegradable and can be discarded in food waste.

## Melamine Care Advice:

The correct handling and care of your Melamine buffet and table ware will enhance the appearance and longevity of the product in use. The following guide will assist you.

Handle melamine dinnerware like any quality dinnerware.

Use only plastic pads or plastic type bristle to remove dried food.

Pre-soak melamine products, if necessary, in a high quality pre-soak dishwashing detergent.

Do not use melamine products in an oven.

Do not use melamine products in a microwave.

Do not use harsh or abrasive cleaners, steel wool, or metal scouring pads.

Do not use chlorine bleach.

Melamine is a thermosetting plastic that is strong, lightweight and hard with the look and feel of ceramic product. It is highly break and scratch resistant, but it is NOT 100% unbreakable, it can be scratched and broken.

Melamine is often used for dinnerware, mixing bowls and laminated counter tops because it resists acids, alkalis and most food stains.

Melamine is hard and smooth and can withstand some fairly warm temperatures, but it does absorb heat and will soften if it gets too hot. While melamine is perfectly safe when it comes in contact with warm temperatures, melamine is not microwavable.

In general, melamine products are not designed to withstand temperatures that exceed 100°C and should not be submerged in boiling water or placed in the oven.

Also, be sure to avoid exposure to hot objects or prolonged exposure to boiling water. Melamine is suitable for use over a bain-marie as the water is circa 70°C, to hold food above a temperature of 60°C.

Melamine is dishwasher safe (as long as the water temperature does not exceed the 100°C guideline). Scouring powder should not be used, as it will scratch the surface, also never use chlorine bleach on melamine buffet ware.

## Glassware Care Advice:

### Storing:

Do not put cutlery into glasses.

Do not stack glasses that have not been designed to stack.

### Using:

Do not pick up glasses in clusters.

Be careful to avoid contact with the beer tap.

Do not put cold liquids into hot or warm glasses straight from the dishwasher as this can cause cracks.

Pre-heat glasses for hot drinks by running them under the hot tap.

### Washing:

These products are specially designed to withstand the rigours of the Foodservice and Hospitality trade, including automatic glasswashers found widely in most businesses. To ensure the quality level of the product it is important to take note of the following:

Always wash new glasses before use.

Always use a non-caustic detergent as caustic detergents affect head retention, etch the glass and give the glass a shadowy tinge.

Water on the premises should be stored at 60°C. If water is stored at a higher temperature e.g. 85°C, even when this is reduced because of travelling to the machine, it could still be high enough to bake debris onto the glass.

Coffee cups should never be washed in a glass washing machine, as coffee dregs can taint the water and stain the glasses – this also applies to drinks that contain cream.

If cracks or chips are found in glasses, they should be discarded immediately and never put in the dishwasher.

## Creative Table Care Advice:

### Natural Woods:

- Store away from direct heat sources and direct sunlight.
- Hand wash in warm soapy water
- Do not soak in water
- Dry immediately
- Not dishwasher safe
- Bamboo drink paddles are suitable for glass washers – always follow the recommended dishwashing procedures outlined by the manufacturer and use the correct dose application of detergent.
- Sourced from a sustainable wood source
- Darwin, Acacia, Olive and Fir Wood will vary significantly in size and shape as these are natural cuts of wood.
- Restore Natural Woods with a wiping of olive oil

### Slate/Granite:

- Being natural stones – our slate and granite items may vary slightly in size and texture.
- The characteristics of slate are that the edges can naturally chip and create sharp points – care must be taken when handling these items.
- To clean wipe down with a damp cloth and mild detergent.
- For Slate – any scratches can be treated with natural oil and this should be followed from time to time to keep the product looking its best.

### Enamel

- Oven proof and Dishwasher safe
- For best results, after use soak in warm water, then wash gently with a liquid detergent
- Do not use abrasive cleaning pads or powders
- Items will chip if handled roughly
- 

Creative Table includes an array of products all of which require different care to ensure you keep them at their best. See below for information on how to look after your Creative Table products.

### Fuji:

- As above.
- However, with increased strength and durability

### Copper Presentation Serve ware:

- Please be aware copper will naturally oxidise over time.
- To maintain an optimum finish, hand washing is recommended.
- Using metal scourers or abrasive cleaners will affect the finish of your copper serve ware, to avoid this, wash in hot water straight after use with a soft cleaning sponge.

### Stainless Steel Presentation Items/Barware:

- Not suitable for cooking and should be used as presentation only.
- Suitable for dishwashers
- Not suitable for ovens or microwaves.
- Galvanised items should always be used with presentation papers.
- Never leave in a damp environment for prolonged periods of time.
